LIBRA NEW MOON – SOLAR ECLIPSE

Solar eclipses are special New Moons which provide fresh ways of seeing. They can reveal deeper insights and a fresh perspective.

move ahead they are required.

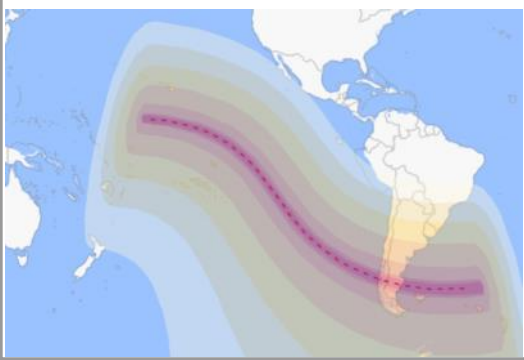

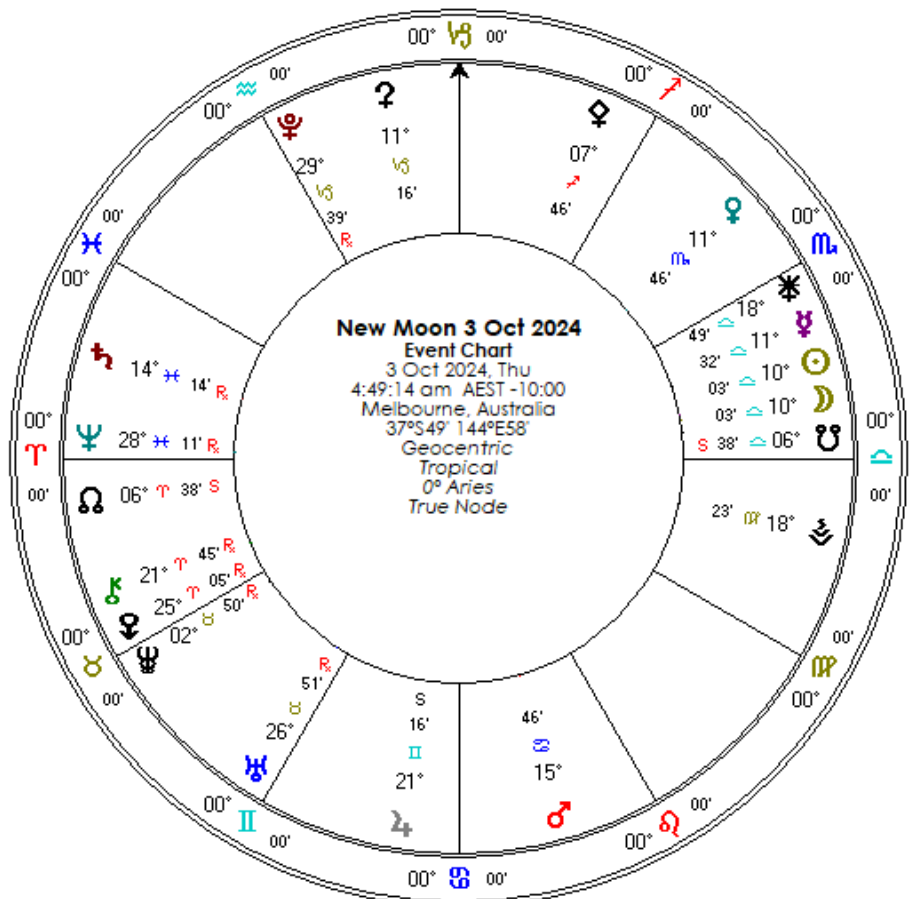

New pathways forward are suggested when Jupiter stations retrograde six days after this eclipse. Jupiter stations often boost confidence and the desire to take risks. This eclipse is a good time to assess options and to consider a new approach. Make a plan and choose wisely.

The chart for this eclipse sees the Sun and Moon squaring Ceres, so environmental challenges are suggested.

Sun and Moon are also squaring Mars, which in itself can be a frustrating aspect.

With the nodal axis, these squares create a cardinal grand cross, which is a tense aspect. Cardinal signs like to push ahead with plans and projects, however these signs have a tendency to over-commit so tasks can become burdensome. Decisions can be difficult with competing priorities, but to

ARIES FULL MOON

Yet again we have a cardinal grand cross which can present us with some difficult decisions. If no decisions were made two weeks ago, there is now additional pressure. Cardinal signs are self-starters and good at making commitments and initiating projects, but it's not possible to be in several places at the one time. While we might want to press ahead with our plans, doing too much can lead to stress and burn-out.

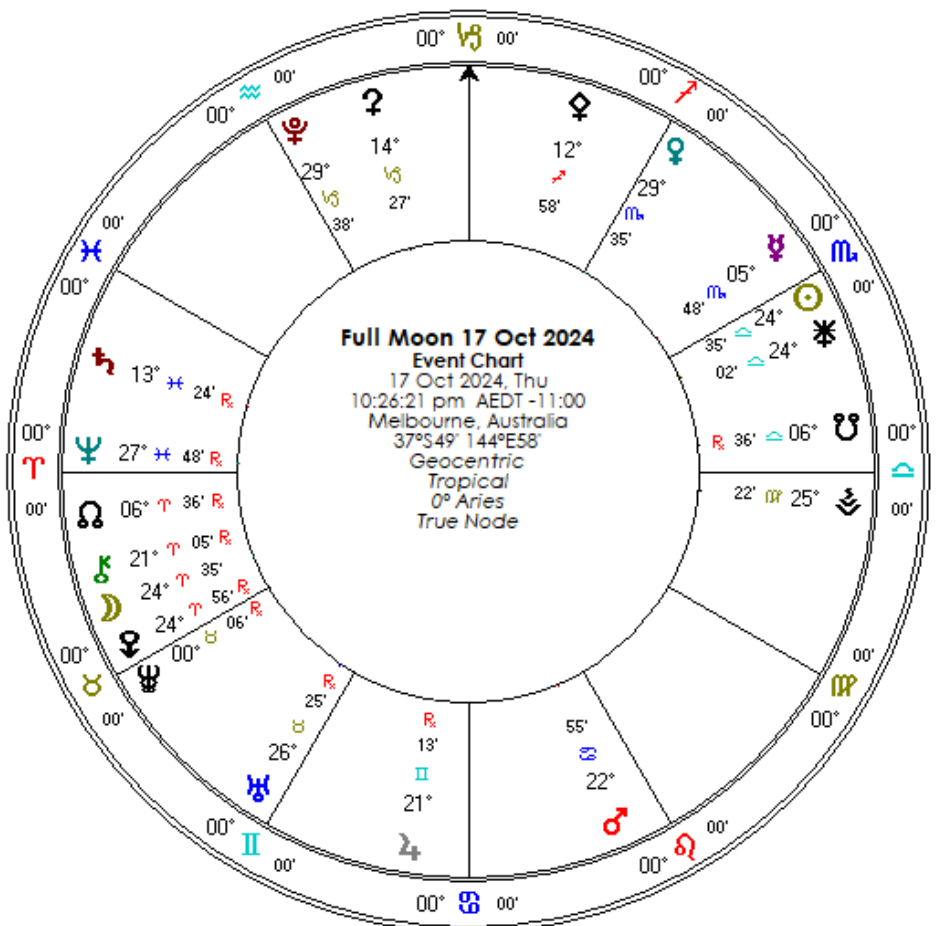

This Aries Full Moon is a Supermoon and it closely joins mischief maker Eris and wounded-healer Chiron.

Meanwhile, Juno aligns with the Sun and all these planets have a square aspect with Mars in Cancer and with Pluto, which can provide healing.

There are a host of powerful aspects in play at this Supermoon, including Venus which is opposing Uranus fore-

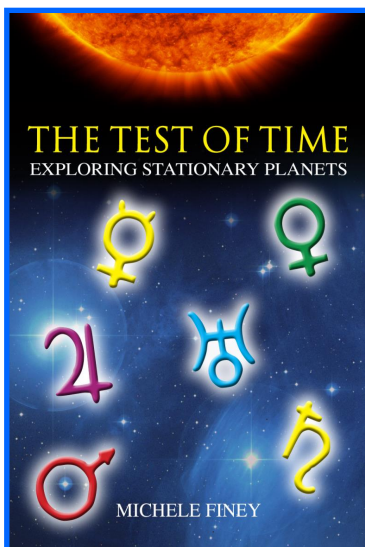

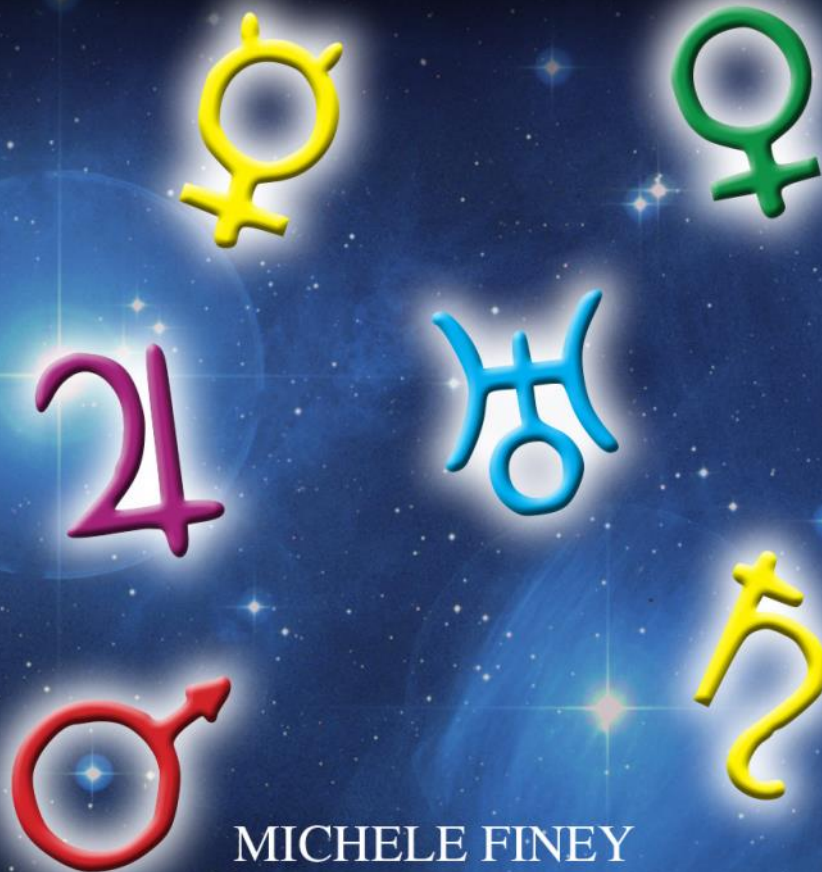

shadowing some relationship curve balls and tricky value judgements.

Pluto recently stationed direct, so it might be time to let go of something that is causing us stress and try a new pathway towards harmony and health.

This book details my research into the 32-year cycle of Venus and Mars.

The symbolic connection between the celestial lovers is mirrored by their interaction as metals copper (Venus) and iron (Mars). This passionate exchange creates life on this planet and has immense impact across social settings and generations.

US ELECTION SIBLY CHART

This month we look at the impact of the October eclipse on the US Sibily chart.

Transiting Uranus is squaring the US Moon, and it has been here for quite some time with more exact hits to come. The Moon in a na-

tional chart represents the people, so the wild ride we have witnessed in US politics looks set to continue, with extreme divisions between left and right and the opinions of the voting public.

Transiting Jupiter is crossing Mars, and is at a virtual standstill, energising the political

campaign with only one month until the election. Transiting Mars is likewise ramping up the verve as it conjoins the Sun.

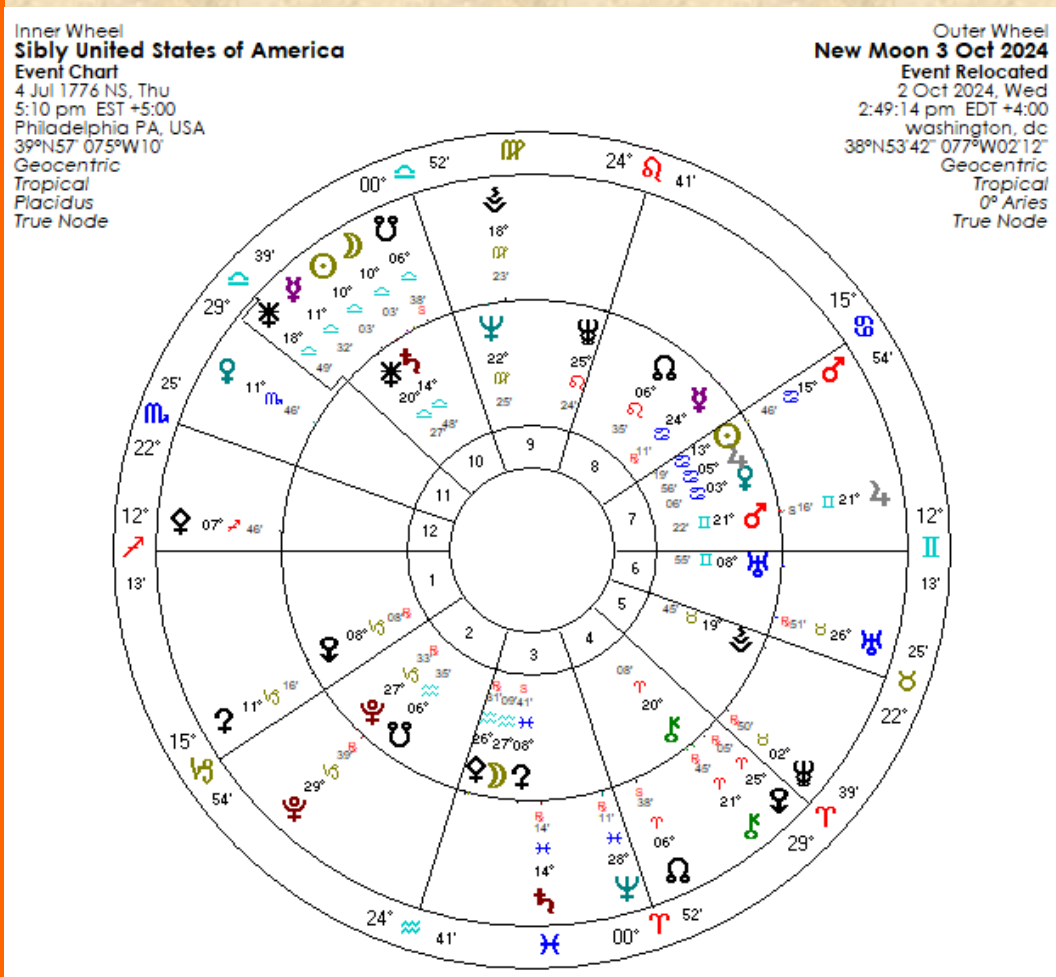

Apart from still undergoing the effects of its recent Pluto return, the US is also experiencing a Chiron return, so themes around wounding and healing are very much in focus.

Meanwhile, Donald Trump has pleaded not guilty (Americans say pled) to a host of new charges concerning his attempts to overturn the 2020 election. His other legal battles and sentencing have been postponed until after the coming election.

Libra is associated with the law and justice, so we may hear more about his legal battles around the time of this eclipse.

The recent debate was held on 11 September. This was the first time that Trump and Harris had met.

It won't be long now until the election. Trump has stated recently if he loses he will not stand for President again.
