

INSIGHT

JULY 2019

We are half way through 2019 already! Time is ticking very loudly with Saturn in its own sign Capricorn converging towards Pluto in early 2020.

This month is eclipse month once more with solar and lunar eclipses focusing stellar rays on the Cancer-Capricorn polarity.

Capricorn asks us to act with integrity and to work hard towards our aims in life. In order to attain success, Capricorn perseverance is needed. It's also the sign we most associate with the world as a whole. Pluto and Saturn combine in this sign to overhaul outmoded sys-

tems. Governments and the corporate world should heed the lessons of this need for restructuring and transformation.

The last time that this conjunction happened in Capricorn was in the year 1518 when the Reformation began, overhauling the authority of the Catholic Church, which was the most powerful of all institutions at that time.

The eclipses this month further highlight what needs to change in our world.

CANCER SOLAR ECLIPSE

The growing importance of cardinal signs Cancer and Capricorn is evident this month with a Cancer solar eclipse and Capricorn lunar eclipse.

This New Moon/Solar eclipse hints at the powerful agenda we are seeing unfold on the global stage. There is a growing discontent with governments across the world. People need to feel secure and free and part of this is our connection to the natural world. Our immediate environment, our home and local neighbourhood are the domain of Cancer. The crab lives in a protective shell. Our personal shells that protect us extend to the environment in which we live, our communities and home planet.

The approaching triple conjunction of Pluto-Saturn-Jupiter in Capricorn will continue to be felt as we get closer to 2020. Taking responsibility and acting with integrity is key to this stellar message. When Saturn and Pluto move into Aquarius it's likely that communities will take matters into their own hands and rise up against governments that fail to act in the best interests of the people and the planet.

This chart has a Mars-Mercury conjunction in Leo, which speaks with a lot of fire about what it perceives as being wrong. This aspect also helps fuel big ideas and concepts.

CAPRICORN LUNAR ECLIPSE

The Moon joins Pluto, Saturn and the South Nodal axis, while the Sun is joined by Venus and the North Node. Decisions now are pressing and likely to have a lasting effect. This is because Pluto and Saturn will unite in January 2020 at 22 Capricorn, close to the degree of this Full Moon/Eclipse.

Saturn-Pluto conjunctions do not happen that often, but they are potent agents of reform. Restructuring and breaking down old systems is a key part of Saturn-Pluto conjunctions.

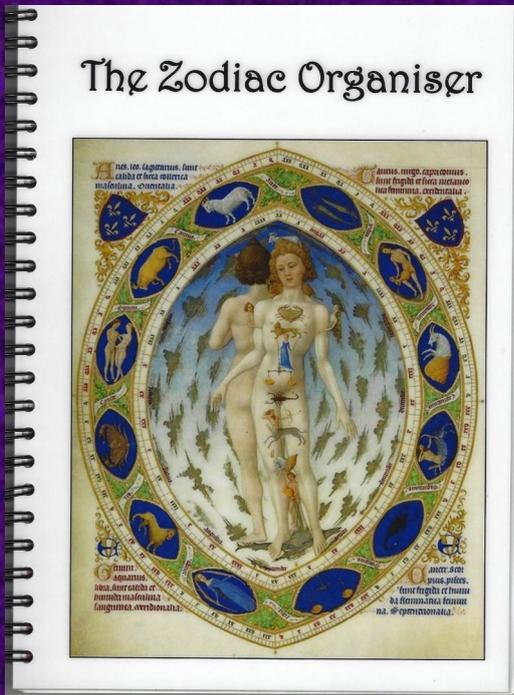

In 1914 the conjunction in Cancer saw the outbreak of WWI and rapid social change in its wake. In 1947 the conjunction was in Leo which saw the rise of new independent states and political affiliations after WWII. In 1982 the conjunction was in Libra the sign of relationship, which saw a new paradigm emerge in the structure of relationships in the wake of AIDS which was first identified in 1981.

As we approach the exact alignment in January next year, we are likely to see a groundswell of change across large sections of society. The last time that this conjunction happened in the sign of Capricorn was in 1518 which ushered in the Reformation, tearing down the authority and structure of the Roman Catholic Church. All large powerful institutions are likely to see this process unfold, starting now with this lunar eclipse.

THE METONIC CYCLE

The Metonic cycle is named after Meton, (5th Century BCE Athenian astrologer) who was the first (as far as we know) to document this amazing cycle.

Every 19 years, eclipses, New Moons, Full Moons, indeed all Moon phases, take place at the same zodiac degree and on the same day of the year. This is because 235 lunar months and 19 solar years are the same length of time, 6939 days.

If you calculate a lunar phase return for your 19th, 38th, 57th or 76th year around your birthday, you will find that both the Sun and the Moon are located at the same position as when you were born.

Significant life events and decisions are often seen at these 19 year intervals. Close to the Nodal Cycle in time, there are often key connections, relationships, career decisions and a host of life altering events.

The Lunar Phase Return at age 19, 38, 57 or 76 can be even more significant if there is a planet making a conjunction to a planet or point in your natal chart.

Apart from looking at your Lunar Phase returns for these important years, you can also explore the Metonic cycle in other ways. For example, any New

Moon, or Full Moon at any time that is located at the same degree as a planet or angle in your chart, will have taken place 19 years previously at that same position, and will again cross that point 19 years in the future.

You can examine any time that was significant in the past to see when that New Moon or Full Moon will happen again.

At a recent presentation organised by the Cosmic Intelligence Agency I discussed the Metonic Cycle. In workshoping the group made a number of discoveries that provided insights into past events.

As you explore this fascinating cycle it will reveal deeper layers of meaning and provide insights into your life path, life lessons and key events.

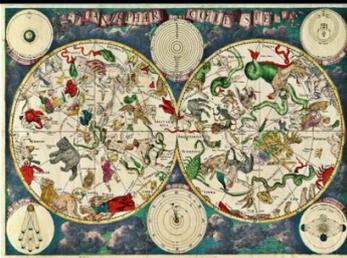

Interestingly, both the Saros eclipse cycle of 18 years and the Metonic Cycle of 19 years are honoured in the Tarot Deck, where the number 18 card is the Moon and number 19, the Sun.

We will examine some lunar phase return charts in part two of this feature in next month's INsight.
